

## REFERENCE

CMC-C has fulfilled designing works, production and delivery of specific equipment, installation, commissioning, testing and servicing works in parts Electrical and Instrumentation for Aurubis for last 20 years.

CMC-C has fulfilled many projects in the following directions:

**Retrofits of MV distributing systems.** CMC-C designed and made reconstruction and modernization of all ten Aurubis' MV Distributing Substations with total of 281 switch-gears.

**Relay Schedule Settings.** By CMC-C proposal the concept for general development of the relay protections was accepted. CMC-C prepared all designs concerning relay settings of LV and MV distributing systems by levels in Aurubis Bulgaria. The entire new Protection and SCADA systems were fulfilled by CMC-C as a sub-contractor of Schneider Electric. CMC-C has signed a Frame Contract for maintaining of the Relay Schedule Settings.

**Changing the operating mode of the MV distributing systems.** CMC-C proposed and designed a reconstruction of the MV systems, which provides an opportunity for parallel operation of all distributing substations. It guarantees an uninterrupted power supply of the production facilities in case of accidents in the electrical systems.

**Frame Contract for maintenance of the MV distributing systems.** CMC-C has a Frame Contract for maintenance and repair activities of the MV systems.

The high quality of work, accuracy and strict fulfillment of the undertaken engagements combined with the high professionalism are enough sufficient grounds to recommend CMC-C, as a reliable and efficient partner.
